

03 Compute Cloud Services (Midterm)

Instructions

Perform the steps below.

Log in to your Huawei Cloud account at <https://www.huaweicloud.com/intl/en-us/>

Go to https://lab.huaweicloud.com/intl/en-us/experiment-detail_1771 and click Start Exercise. If you don't have available hours, you may use any of the virtual labs below but make sure to follow the instructions stated here: [Compute_Services_Practice.pdf](#)

https://lab.huaweicloud.com/intl/en-us/experiment-detail_1880

https://lab.huaweicloud.com/intl/en-us/experiment-detail_1844

https://lab.huaweicloud.com/intl/en-us/experiment-detail_1865

https://lab.huaweicloud.com/intl/en-us/experiment-detail_1866

https://lab.huaweicloud.com/intl/en-us/experiment-detail_1769

Click the Desktop (Exercise Interface) icon and launch Google Chrome. Log in using the provided Sandbox credentials as an IAM user.

Create a Linux ECS. Refer to Lab 1.1 Step 12. Screenshot your output. (10 points)

Accomplish Lab 3.2 and Lab 3.3. Do not click End Exercise.

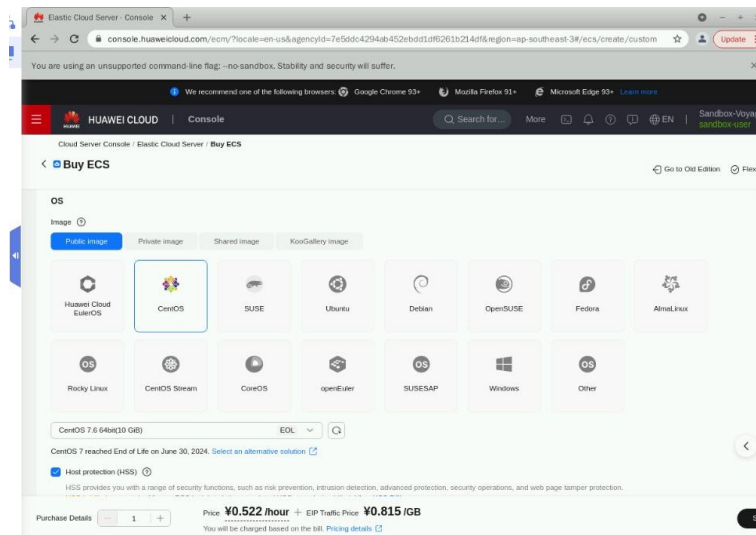

Screenshot your output from Step 5 of Lab 3.2 and Steps 5-6 of Lab 3.3. (3 items x 10 points)

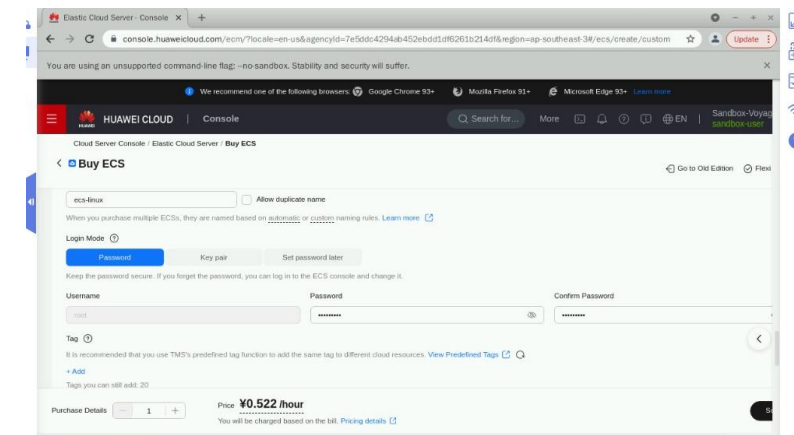

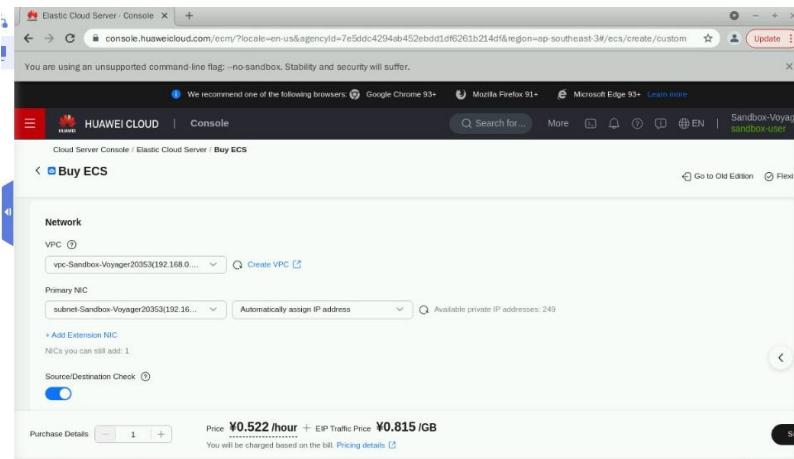

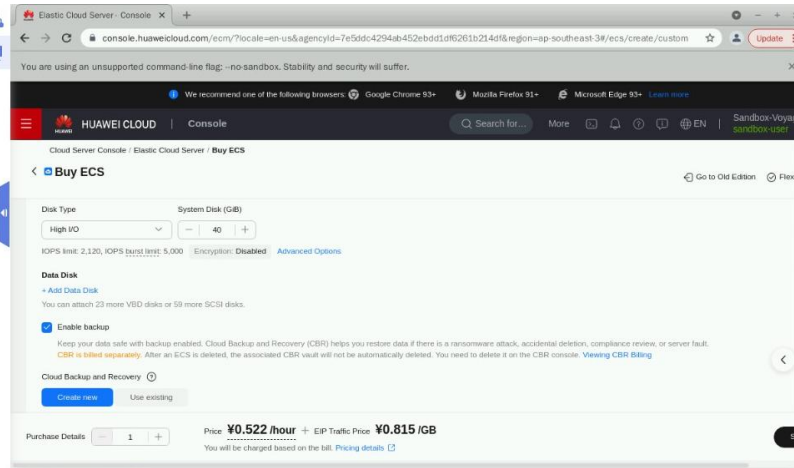

Place your screenshots in Word.

In exactly four (4) sentences, discuss the benefit of using Image Management Service. (10 points)

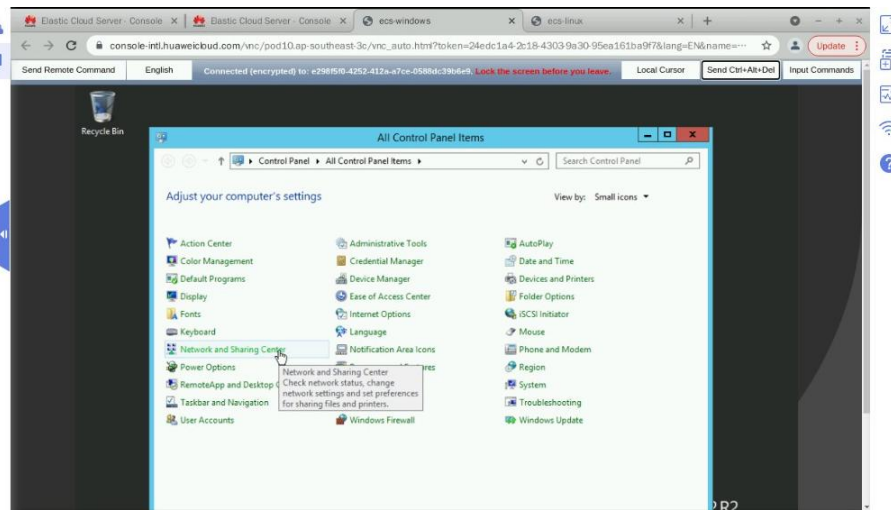

Upload a PDF version of your work.

Lab 1.1: Step #12

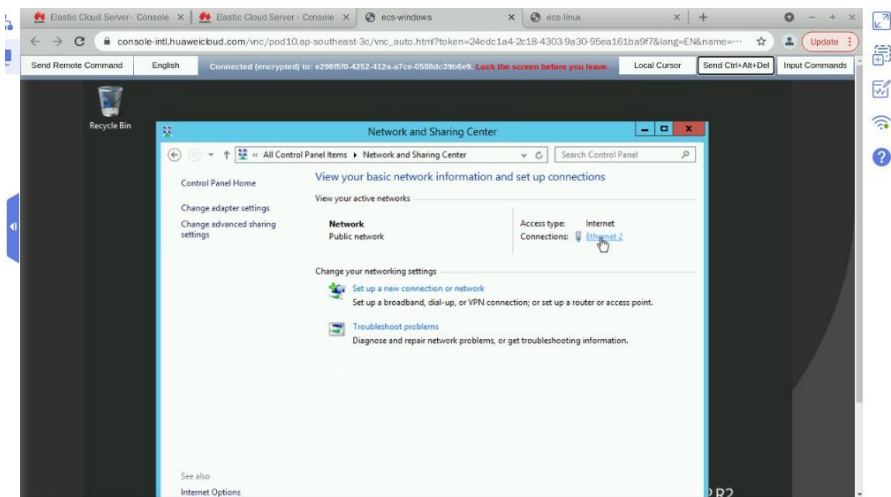

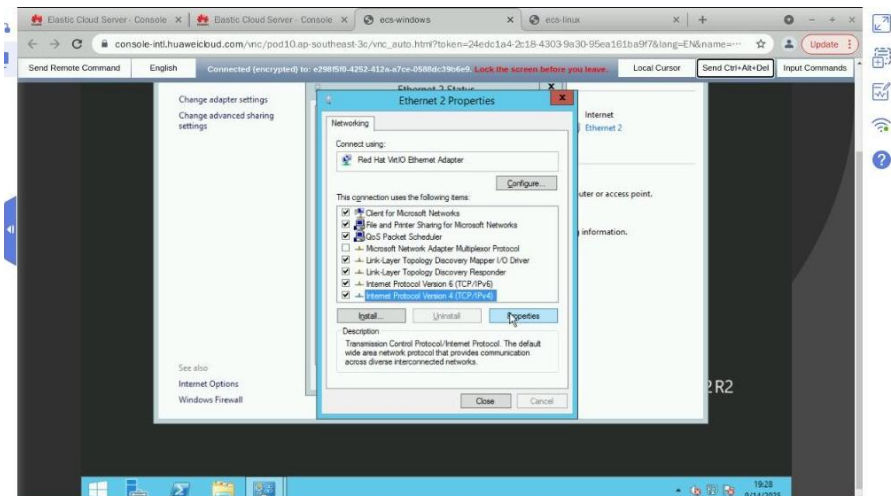

Lab 2.1: Step #2

In exactly four (4) sentences, discuss the benefit of using Image Management Service. (10 points)

-From doing this activity, I've learned the useful functions of Huawei Cloud's Image Management Service help our group handle server images in a smooth and simple way. It lets us keep our files in one safe place, so we can reach it anytime we need. This makes setting up new servers more quicker for us because we can use the same images without starting over again. Because of these, our work feels more organized and it can be less stressful.
