### Buy ECS

Go to Old Edition Flex

Disk Type: High I/O System Disk (GiB): 40

IOPS limit: 2,120, IOPS burst limit: 5,000 Encryption: Disabled [Advanced Options](#)

**Data Disk**

+ Add Data Disk

You can attach 23 more VBD disks or 59 more SCSI disks.

☒ **Enable backup**

Keep your data safe with backup enabled. Cloud Backup and Recovery (CBR) helps you restore data if there is a ransomware attack, accidental deletion, compliance review, or server fault. **CBR is billed separately.** After an ECS is deleted, the associated CBR vault will not be automatically deleted. You need to delete it on the CBR console. [Viewing CBR Billing](#)

Cloud Backup and Recovery [?](#)

Create new Use existing

Purchase Details: 1 Price: **¥0.522 /hour** + EIP Traffic Price **¥0.815 /GB**

You will be charged based on the bill. [Pricing details](#)

Using Image Management Service allows organizations to quickly create and deploy standardized system environments. It ensures consistency by providing pre-configured images that reduce errors during setup. This improves efficiency since administrators can save time by reusing images instead of configuring systems from scratch. Additionally, it enhances security by allowing updates and patches to be applied uniformly across all instances.
